

API Third Party Onboarding Process Guidebook

This instruction will guide you on how to integrate with Wayfair on order management through API. At the end of this guidebook, you will find the link to the instructions on how to complete inventory integration

Order Management Testing

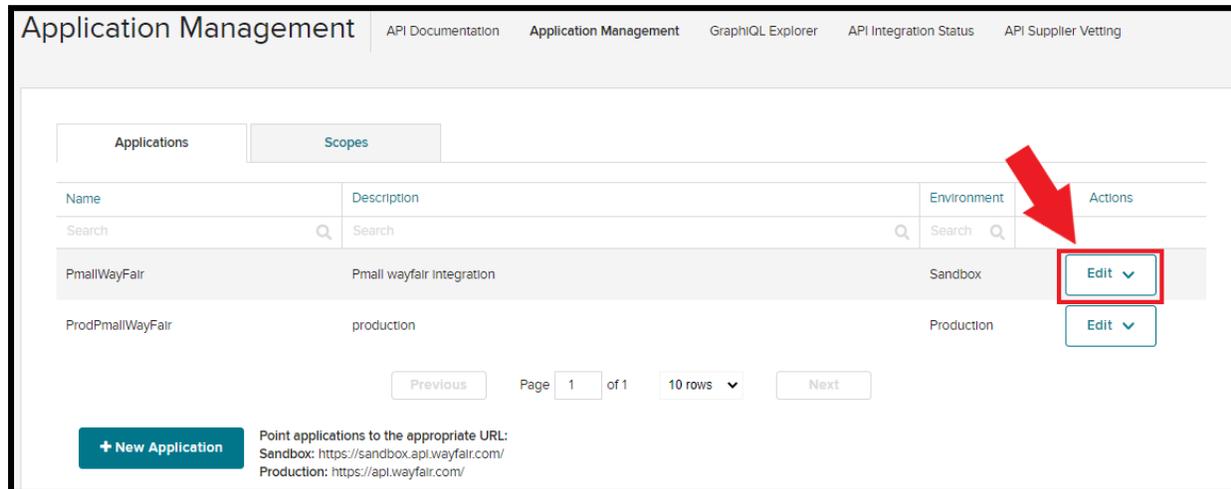

- 1) [Grant your account access to Wayfair's API tools.](#)
 - o Login on Partner Home/Or click on the link above
 - o Go to the Menu on the left
 - o Go to Account management -> User management
 - o Click on the edit icon, see in the picture
 - o Check the box "API" to grant permission to create API application
 - o Click "Save" to apply the change

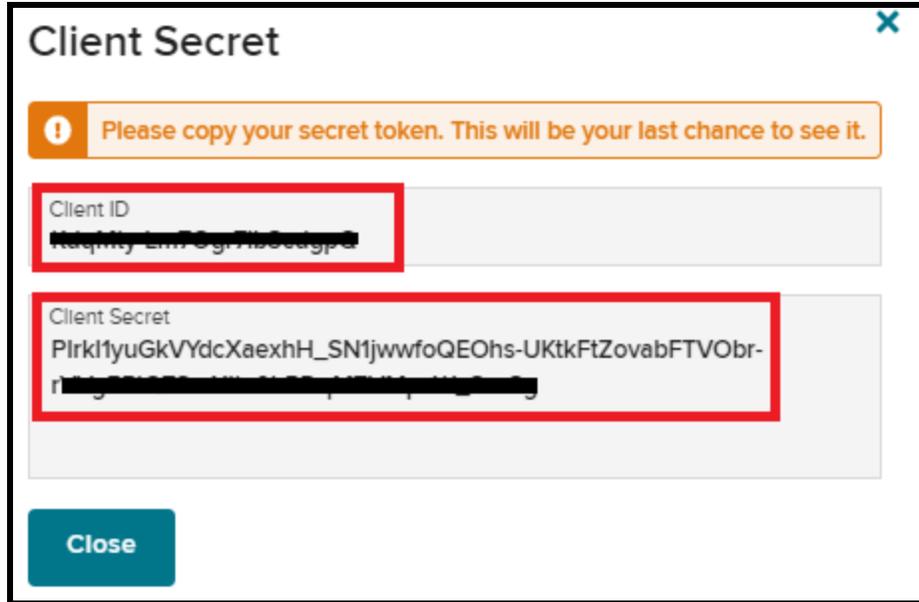

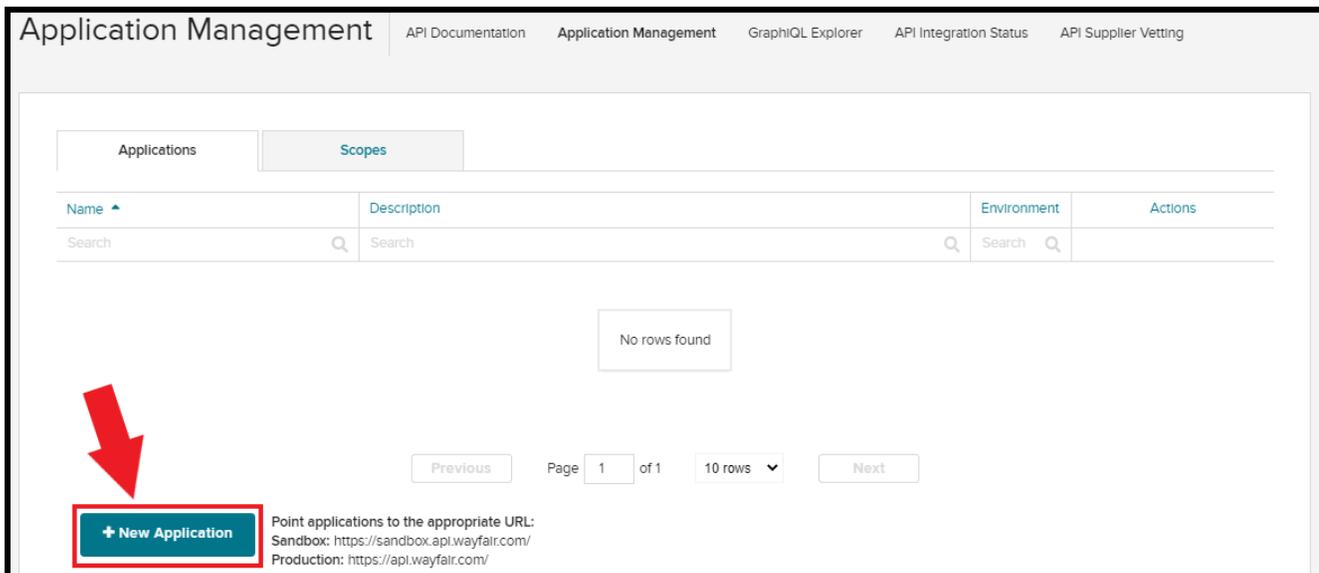

2) [Go to your Application Management page.](#)

- Go to Menu and the left/or click on the link above if already logged in Partner Home
- Go to Developer -> Applications
- If you already created applications during an earlier integration, you can use your existing Sandbox application for testing. Provide *[Third Party Provider]* with the **Client ID** and **Client Secret**.
-

- If you do not have applications from an earlier integration, create 1 Sandbox Application for testing and 1 Production Application for live operations using “+ **New Application.**” Provide [Third Party Provider] with the **Client ID** and **Client Secret** for both applications.

Create Application ✕

Sandbox Production

Save 

- 3) Input Sandbox Client ID and Client Secret into *[Third Party Provider]*'s software settings and complete testing.

- 4) [Go to Wayfair's Integration Status Page](#) when *[Third Party Provider]* informs you that [testing is complete](#).
- Go to Menu/or click on the link above if already logged in Partner Home
 - Go to Developer -> Supplier Integration Status
 - Grant your Production Application permission to go live for all APIs with a "Ready for Production" status by clicking "View/Update"
 - Find your Production Application and click "Yes" under "Live in Production"

Supplier Integration Status | API Documentation | Application Management | GraphQL Explorer | API Integration Status | API Supplier Vetting

View the status of your integration and enable Production APIs on your application

Note: Only the processes with automated testing capabilities are shown below. If you have questions, please add a comment to your integration ticket (for North American suppliers) or reach out to your integration agent/account manager (for EU suppliers).

Supplier: Your Company

API	Status	Date Last Updated	Actions
Purchase Order	Ready for Production		View/Update
Ship Notice	Ready for Production		View/Update
Shipping	Ready for Production		View/Update

Successfully updated application scopes

Application: Supplier Name - Production

Live in Production: No Yes

Available Suppliers: Your Company

5) Go back to your [Third Party Provider]'s software settings and switch to production

Order Management integration is now complete!

If there are any errors during order management testing that require Wayfair assistance, you can request assistance by following the steps [HERE](#).

Inventory Testing

- 1) [Submit a ticket to Wayfair.](#)
 - a) Login on Partner Home/or click the link above if already logged in Partner Home
 - b) Go to Menu -> Tickets -> Submit a Ticket
 - c) Submit a Ticket for: Inventory & EDI
 - d) Ticket Type: Set Up an Inventory Feed or EDI Connection with Wayfair
 - e) Tech Contact Name: Third Party Onboarding Representative
 - f) Tech Contact Email: Third Party Onboarding Representative
 - g) What Would You Like To Set Up? (check all that apply): API Integration

h) Any Additional Comments?: API Inventory & vendor's name

2) Send Wayfair a test inventory update containing your full product line for all of your warehouse locations.

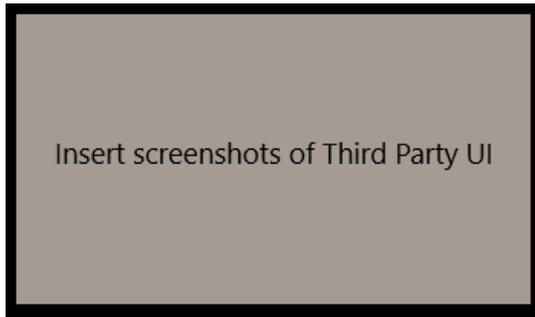

3) [Go to your Ticket Inbox when \[Third Party Provider\] informs you that inventory testing is complete.](#) Your ticket is “Business Related Tickets” in the “Inventory & EDI” section.

- Update your ticket with “Inventory testing is complete.”

- 4) Wayfair will update your ticket once permission to go live with API Inventory has been granted. You can now switch your inventory live.

Inventory integration is now complete!
